THE RUSSIAN INVASION OF UKRAINE: A CRISIS MANAGEMENT SIMULATION

EXCELLENCE AWARD

FOR TOP ANALYST CONTRIBUTION

IS GIVEN TO _____

ANDREW K P LEUNG

For their considerable contribution to the discussions and analyses in "The Russian Invasion of Ukraine" simulation. In the exercise, the Alexander Hamilton Society alumni and Wikistrat experts collaborated in order to analyze how a potential escalation scenario could develop and impact the security environment in Europe. Through two dynamically changing strategic scenarios, they explored how six different actors would be impacted by and respond to the new security environment resulting from the Russian invasion and the potential occupation of Ukraine.
